Parallels will provide Microsoft with Windows 11 support for more recent Macs

Since 2021, it has been possible to run Windows 11 on ARM Macs using Parallels, and it even ran reasonably well. However, at the time, you had to use an Insider preview of the OS, and Microsoft stated at the time that it did not intend to support new Macs. The approved method eliminates licensing issues, and Parallels Desktop 18 now makes it simple to download and install Windows 11.

Even if not in the manner you might hope, Microsoft has officially approved a method for running Windows 11 on ARM-based Macs. The company has "authorized" Parallels Desktop 18 to run the ARM versions of Windows 11 Pro and Enterprise on M1- and M2-based Macs, according to a new support article. The virtual machine could theoretically be used without offending your IT manager if you need Windows for work.
